

# High Force Air Mover

**Small yet Powerful**

## Specifications

Features	High Force Air Mover	Specifications	High Force Air Mover
1/2 HP Motor	Y	Model	High Force Air Mover
2 Speeds	Y	Power Supply	220~240V / 50HZ
Low Amp Draw	Y	Power Cord Length	15Ft / 4.5 M
Can Operate in 3 Positions	Y	Power Input	1.9 Amp
Fully Stackable	Y	Wattage	375W
GFCI Daisy Chain	Y	Blade	Ø 47 x 11.5 cm
Low Noise	Y	Air Volume	860CFM
Light Weight and Compact	Y	Speed	1370RPM
Impact Resistant Body	Y	Plug	Standard 13A 3 Pin
Integrated Handle	Y	Nested Stacking Saves	¾ Inch Per Unit
Protective Fan Cover	Y	All Fasteners	Stainless
No Air Flow Dead Spot	Y	Easy Clean	Top, Motor & Electronics Lift Out
Suitable for Carpet / Floor Drying	Y	Weight	9.5 / 10.5 Kgs
1 Year Parts and Labour Warranty	Y	Dimensions	600 x 445 x 240 mm

### Application

The High Force Radial Air Mover is quiet running and has a low power requirement, meaning it can be plugged directly into any standard wall receptacle. Without ducting it will draw 1.9 amps. (Use of ducting will reduce this). Up to 6 units can be daisy chained on a standard 15-amp branch circuit. The 10 amp circuit breaker protects the unit and any other devices connected to it. The unit can work in 3 different positions, is fully stackable and can have the added Hepa Filter Kit for extra protection. The High Force Radial Air Mover is the ideal choice for small water leaks, carpet and floor Drying. Best of all it is affordably priced.

### Key Design Features

- Small and compact
- Nested stacking saving ¾ inch per unit
- Solid integrated handle for bookshelf stacking
- All fasteners are stainless preventing rust
- GFCI Protects the unit and anything plugged into it
- Robust polypropylene housing
- No "Air flow dead spot" in front of the unit
- Easy to clean - The top, motor and the electronics all lift out
